

Monday 29 January 2018

Well done to all Year 9 students who last week faced their examination week with enthusiasm and resilience. These assessments will form part of a package of information and reporting that will help students to consider their next steps beyond Year 9, into GCSE study and beyond.

Students in Year 9, 10 and 11 will enjoy a play in French on Tuesday afternoon. This humorous play will give students the opportunity to hear “live” spoken conversation, of course a key skill in languages.

Later this week, our most able mathematicians will face the Intermediate Mathematics Challenge. How might you fare with logic problems like those below??

We look forward to next week, when we have our bi-annual Careers Week. Students will have the chance to attend workshops by professionals in an array of careers, from agriculture to medicine, journalism to engineering. Speakers will speak about what their job entails, what pathway they took to get there and what opportunities there might be in similar fields.
