

Monday 25 February

I hope that all our students, staff and friends of the school enjoyed the mild and bright weather over half-term. The perfect antidote as the days stretch out.

Just before half-term, Year 11 students had a session which reminded them of some helpful revision strategies. Students have been given paper copies with key advice from these sessions but for their use these supporting materials are also available electronically here:

1. Subject guidance
2. Revisions – advice and guidance
3. Presentation from the session

This week Year 11 Food and Nutrition face their first GCSE examination, as they have their practical examination. We wish them all well.

On Wednesday, Year 9 students consider their next steps, at the Options Evening. This evening will start at 6.30pm with a talk in the main hall explaining the process of choosing their options, followed by chance to talk to Heads of Department about what their subject entails at GCSE Level study. This evening will finish by 8.00pm.
